

SABITECH's Participation in IBA 2023 Exhibition in Munich, Germany

SABITECH, a leading company in the bakery equipment manufacturing industry, offers advanced solutions for producing various types of bread, including Arabic, European, Mexican, and notably Lebanese bread. The company was founded by a group of experts with over 30 years of extensive experience in this field.

SABITECH participated in the IBA 2023 Exhibition in Munich, Germany, from October 22 to October 26, 2023. This exhibition provided the company with the opportunity to showcase its latest products and technologies to an international audience of bakery industry specialists.

SABITECH's products are known for their innovation and quality. Its engineers have developed advanced designs that meet the industry's requirements in this modern era. The company's machines are characterized by their simplicity and reliability, making them strong, user-friendly products with excellent performance.

In line with its commitment to social and environmental responsibility, SABITECH has taken serious steps to reduce raw material waste and diversify energy sources through the use of a solar farm. They also incorporate green solutions at every stage of manufacturing to save materials, eliminate waste, and consume energy in a more efficient and effective manner.

SABITECH's participation in the IBA 2023 Exhibition is seen as a strategic opportunity to expand its international network and enhance its position as a leading company in the bakery equipment manufacturing industry.
